rafael@turnes.com.br

### CERTIFICATIONS

### LANGUAGES

Portuguese - native speaker

English - B2

### LINKS

GitHub LinkedIn

### SKILLS

Linux

AWS

Azure

Python

Docker

Automation

### Profile

Experienced System Administrator and Cloud focused looking for new ways to architect and deploy things. I don't like to do boring stuff repeatedly. In case I need, I'll find a way to automate it. I'm a faster learner and I love to learn new things. I do prefer to learn in practice, I'm always doing labs or testing frameworks, solutions, etc..

My background is infrastructure and deploy things. But I'm making a move to DevOps related. So recently I've taken several mini-courses of development and microservices. I've learned HTML, CSS, React, VueJS, NodeJS and Python. Now I know how to build and consume API's.

### Employing History

#### SYSTEM ADMINISTRATOR - SANTA CATARINA STATE UNIVERSITY, BRAZIL

May 2015 - PRESENT

Mainly managing network, servers and supporting the users at the university.

Some key techs: pfSense, iptables, Huawei networks, Linux, Windows Server, XenServer, Docker, Ansible, FreeNAS, Nextcloud, DokuWiki,
